

New Kapton® CS Low Color Product Family

Developmental Polyimide Films

Kapton® CS Series is a new Kapton® product platform based on:

- New polymer chemistry
- Highly transparent and colorless
- Available thickness range from 10 to 30 μm

Key attributes:

- High transparency, Low color
- Low moisture absorption
- Low Coefficient of Thermal Expansion
- High Glass Transition Temperature
- High Modulus
- Excellent Dimensional and Thermal Stability
- Extremely Smooth Surface
- Lower Dk & Df than traditional Kapton® polyimide films
